

Invitation to Attend Informal Volunteer Training for Japanese Knotweed Eradication Programme

River Holme Connections is looking for volunteers to **help us put an end to Japanese knotweed** in the whole of the River Holme Catchment, on the River Holme, New Mill Dike and Mag Brook at Meltham. During September and October we will be paying contractors to treat the Japanese knotweed throughout the catchment and much work will be done behind the scenes to make this possible. We would like you to be part of this bold project: roles for volunteers include spreading the word, talking to businesses, fundraising, supporting the contractors during treatments, monitoring and surveying and office – based admin. This is a really worthwhile and rewarding programme with opportunities to work both in and outdoors.

Training will take place on Wednesday 23rd August from 10a.m. - 12 noon at Thongsbridge Cricket Club followed by a big public meeting and awareness session on the afternoon of Friday 8th September.

Please get in touch if you can spare some time to help,
or would like to attend the training.
