

HoTT Film Nights

Our next film screening on *climate change related issues* is on an **ENERGY** theme and takes place 7.30pm in Brambles café bar upstairs room in Holmfirth on:

Thursday 26th October 2017

Our feature film is the **FUTURE OF ENERGY: Lateral Power to the People**, an award-winning 64 minute US 2015 film documentary. The film illustrates that renewable power on a large scale is not just a dream, but rather a viable option already being implemented by many communities, cities and businesses. This will be preceded by 30 minutes of short film clips on other related energy issues impacting on a sustainable lifestyle here in the UK.

The Future of Energy is a positive, fun film that focuses on energy solutions and the people behind the renewable energy revolution. Two model US towns are highlighted for their exemplary steps towards clean energy: Greensburg, Kansas, and Lancaster, California. The film also highlights the broader citizen movements for clean energy, showcasing especially how the youth of today are helping to lead the change.

“The Future of Energy is really about the clean energy revolution happening right now... By the final credits, you’ll know both how and why renewable energy is the cleanest, quickest, cheapest, and safest way to supply all of our energy needs” says Michael Brune, Executive Director, Sierra Club

Come along and make your own mind up about the green energy revolution!

Free film night, but donations towards film cost welcome.

Forthcoming film nights planned for 2017 covering other themes are:

Thursday 14th December - **TRANSPORT**

Put this date in your diary!
