

## HoTT Environmental Film Club - Film Night Thursday 14th December 2017 **Transport** theme

List of Films to show on the night

Ref	Theme		Title	Year	Length Mins	Ratings Various	Description	Director or Producer	Organisation	Located	Web references
			<b>Feature Film</b>								1
4	Transport		<b>Freightened: the real price of shipping</b>	2016	52 mins	IMDB RT	FREIGHTENED: the real price of shipping! - this award winning 2016 52 minute film reveals in an audacious investigation into the mechanics and perils of cargo shipping; an all-but-visible industry that relentlessly supplies 7 billion humans and holds the key to our global economy, our environment and the very model of our civilisation. The cargo shipping industry is a key player in world economy and forms the basis of our very model of modern civilisation; without it, it would be impossible to fulfil the ever-increasing demands of our societies. Yet the functioning and regulations of this business remain largely obscure to many, and its hidden costs affect us all. Due to their size, freight ships no longer fit in traditional city harbours; they have moved out of the public's eye. The film sheds some light on the many faces of world-wide freight shipping and the consequences for our planet!	Denis Delestrac		Green Planet films	Green Planet films £38 for a community screening licence

4	Transport	Future	<b>Green Technology is the Future of Transport</b>	2017	6.2	7,000 YouTube views	In the busy 21st century, getting from A to B in the safest and most efficient way is becoming increasingly important. However, with ever depleting non-renewable sources such as oil, a number of companies are looking into more sustainable methods of transportation.	Journeyman pictures		YouTube	<a href="https://www.youtube.com/watch?v=3GZKyEuEz8A">https://www.youtube.com/watch?v=3GZKyEuEz8A</a>
4	Transport	Cars	<b>When will fully autonomous cars be with us</b>	2017	5.5	15,000 YouTube views	Autonomous vehicles have been promised us for years -- and while electric vehicles are accelerating the move toward full autonomy, it's becoming clear that just like electric vehicle rollout predictions, autonomous vehicle predictions have been a little... well.. enthusiastic, especially when there are still many legislative hurdles that lie ahead for autonomous vehicles. Part of the problem lies in the nomenclature used for current generation advanced driver assistance features like Tesla's Autopilot, Cadillac's SuperCruise and Nissan's ProPilot, all of which are often confused as offering full autonomy when in fact they are at best, Level 3 (at least at the time of writing this). So when will we see fully autonomous (Level 5) vehicles on our roads?	Transport Evolved		YouTube	<a href="https://www.youtube.com/watch?v=r7GgIN8Gyng">https://www.youtube.com/watch?v=r7GgIN8Gyng</a>
4	Transport	Cars	<b>Ethical dilemmas of Self-driving cars</b>	2016	4.2	700k YouTube views	Self-driving cars are already cruising the streets today. And while these cars will ultimately be safer and cleaner than their manual counterparts, they can't completely avoid accidents altogether. How should the car be programmed if it encounters an unavoidable accident? Patrick Lin navigates the murky ethics of self-driving cars.
